50 mg,
10 Tablets

Headaches

Headaches are a common issue caused by factors like stress, dehydration, or underlying health conditions. **Over-the-counter (OTC)** medications can effectively relieve most headaches. Analgesics like acetaminophen (Tylenol) help with mild to moderate pain, while NSAIDs such as ibuprofen (Advil) and naproxen (Aleve) reduce inflammation and treat tension headaches or migraines.

For best results, take medications at the onset of symptoms and avoid exceeding recommended doses to prevent side effects or medication-overuse headaches. Persistent or frequent headaches should be evaluated by a healthcare professional.

- Compliance packaging
- Med checks
- Clinic days
- Compounding
- Prescription transfer from other pharmacies

Allergies occur when the immune system reacts to a foreign substance, such as pollen, pet dander, or dust mites, mistakenly identifying it as harmful. This reaction triggers the release of chemicals like histamine, leading to symptoms such as sneezing, runny or congested nose, itchy or watery eyes, and skin rashes. These symptoms can vary in severity and significantly impact daily life.

Common Symptoms

- Sneezing and runny nose
- Nasal congestion
- Itchy or watery eyes
- Skin rashes or hives

Managing allergies often involves avoiding triggers, but over the counter (OTC) medications can provide relief for common symptoms.

- **Antihistamines:** Reduce sneezing and itching. Examples include loratadine (Claritin), cetirizine (Reactine), and fexofenadine (Allegra).
- **Nasal Sprays:** Corticosteroids like fluticasone (Flonase) and triamcinolone (Nasacort) ease inflammation and congestion.
- **Decongestants:** Short-term relief for nasal congestion. Options include pseudoephedrine (Sudafed) and oxymetazoline (Drixoral).
- **Eye Drops:** Antihistamine drops like naphzoline hydrochloride/pheniramine maleate (B+L Soothe Allergy) relieve itchy or watery eyes.
- **Mast Cell Stabilizers:** Cromolyn sodium (Cromolyn) helps prevent allergy symptoms before they start.

Selecting the right medication depends on the specific symptoms, and it's essential to follow the product's instructions to ensure safety and effectiveness. Choose products that target your symptoms and always follow dosing instructions.

5⁹⁹

Bausch + Lomb Soothe[®], Allergy, 15 mL
